EXTRA CURRICULAR ACTIVITIES

2022 - 2023

FastCampus - BackEnd Developer

Computer Specialist in Spreadsheet & Database Leve - 1

Certificate computer literacy.

2020

Korean History Proficiency Test Level - 1

Evaluates the knowledge of Korean History.

Completed whole process of learning Java, Github, SpringBoot etc that are necessary in developing. Studied and did TechTalk activities upon several different subjects. Leading algorithm study group, I solved problems and did code review with my team members. Developed CARD MONKEY service that recommending & applying cards based on user's interest, by collaborating with Front-End developers. Developed MEDIMATCH service which helps human resource management in hospitals/clinics. Especially in this project, company, UX/UI, Front-End, Back-End team have participated all together.

2018 - 2019

Seoul City DongHaeng Project

00 middle school,00 high school education outreach

As part of talent donation, I did education outreach activities over 60 hours. It was very pleasure experience to contribute to society.

2017 - 2018

Hyundai H-jump School

Local children center volunteer activity

Doing steady volunteering activity over 218 hours. Mainly for children of multicultural families and low-income families. Being their friend, I could draw out positive changes. It was thankful, valuable time.

2017 - 2018

KT&G SangSangUniv

Singing & Acting club

Participated the whole process of singing & acting club, from planning to performing. Since team members had diverse backgrounds, I learned how to do team work with people who have different thoughts.
